

**S7: Statistical analysis of difference between the number of the nodes involved in overlapping modules in normal and cancer protein interaction network.**

<b>Tissue</b>	<b>Normal</b>	<b>Cancer</b>
Cervix	7	8
Lung	7	11
Ovary	5	11
Prostate	6	9
<i>P</i> -value		0.00768

Supplementary 7 of:

Banik, R., Rahman, M., Rahman, K., Islam, M., & Enayetul Babar, S. (2016). Comparison of molecular signatures in large-scale protein interaction networks in normal and cancer conditions of brain, cervix, lung, ovary and prostate. *Biomedical Research and Therapy*, 3(4), 605-615.
